State general fund and tuition fees: public higher education .....	75
Average annual FTE: public institutions .....	76
Annual tuition and fees: public institutions.....	79
Financial aid .....	81

## Overview

The Washington Higher Education Coordinating Board publishes its “Higher Education Statistics: State of Washington” on a regular basis. We are redesigning the format and presentation of this year’s publication, which is scheduled for distribution in late fall. But we have posted certain data on this site to provide the type of information that is available now. We will add more information to the site as it becomes available.

If you have questions about information presented here, please contact the Higher Education Coordinating Board at [info@hecb.wa.gov](mailto:info@hecb.wa.gov)

“Higher Education Statistics: State of Washington” is a summary of information and data on Washington’s colleges and universities. The first edition, published in February 1991, contained historical data beginning with 1980. This current edition presents historical data and updates statistics through 2000.

This document focuses on data for publicly funded two- and four-year colleges and universities, as well as data for 15 of the major four-year, degree-granting independent institutions

Washington has six public four-year institutions, 29 state-funded community colleges and five technical colleges (plus Seattle Vocational Institute, which is part of the Seattle Community College district). Data are provided for each of the public four-year institutions, and summary data for the community and technical colleges as a whole.

Data for the six public four-year institutions are presented separately for each institution, along with a public four-year total. Branch campus enrollment, degrees, and finance data are included with the appropriate parent institution. However, separate enrollment information on each branch is included in the final section.

Data for independent institutions are provided in summary form for the 15 schools (for selected tables, additional displays present data for each of the 15 independent institutions).

**Page 9** lists all institutions represented in the data tables, and **pages 13 and 14** provide maps of their locations.

In addition to the 15 independent institutions included in the data displays in this document, Washington has a number of other private / independent higher education institutions. Most of the additional institutions are based outside Washington but have permission to offer

coursework within this state. The tabulation on **page 15** lists these additional institutions, with enrollment and degree information, if available.

Tables in this document use several terms and abbreviations that are explained in the section entitled “Definitions.” Information to compile the various charts and graphs was derived from both national and state sources. A short description of these sources can be found in the section “Data Sources.” The major source for enrollment and degrees granted is the annual IPEDS (Integrated Postsecondary Education Data System) survey, which is conducted each fall by the U.S. Department of Education.

This document presents data in three sections: Enrollment, Degrees Granted, and Finance. The first section, “**Enrollment**,” displays the total number of students in each type of institution. Enrollment data for each institution includes both the main campus and any branches or centers of that institution. Other tables present the data by gender, race/ethnicity, and field of study. Several additional tables display enrollment by level, residency status, and full-time/part-time status. National comparisons show Washington’s participation rate in higher education in relation to other states.

Section 2, “**Degrees Granted**,” presents the total number of each type of degree: associate, bachelor’s, master’s, doctorates, and first professional degrees (associate degree data are presented for two-year public institutions only). Tables also present degree data by gender, field of study, and race/ethnicity.

Section 3, “**Finance**,” displays General Fund expenditures over time for higher education and for other state government functions. This section also contains tuition and fee rates for students at public institutions. Summary information on financial aid for students in this state is included in this section.

### **Other highlights**

“Higher Education Statistics” is designed to provide a comprehensive overview of higher education in the state of Washington. Updates are produced periodically.

In addition to this document, other statistical information about higher education in Washington is available from these sources:

- The Office of Financial (OFM) produces a report, “Higher Education Enrollment Statistics and Projections” each biennium. This report is available on the Web at the following address: <http://www.ofm.wa.gov/hied/hiedtoc.htm>. The supplement is available at <http://www.ofm.wa.gov/hiedsup/hiedsuptoc.htm>

- The State Board for Community and Technical Colleges produces, each year, a fall report and an academic year report. These are available on the Web at the following site:  
[www.sbctc.ctc.edu/Pub/Pub.htm](http://www.sbctc.ctc.edu/Pub/Pub.htm)
- Information on Washington's private vocational schools is available from the Workforce Training and Education Coordinating Board. The Web site is [www.wa.gov/wtb/](http://www.wa.gov/wtb/)

## **HECB responsibilities**

The Washington Higher Education Coordinating Board was established during the 1985 legislative session to provide planning, coordinating, monitoring, and policy analysis for higher education in Washington in cooperation and consultation with the institutions' autonomous governing boards and with all other segments of postsecondary education.

The board is composed of nine members selected by the governor and confirmed by the Senate. The governor designates the chair, who serves at the governor's pleasure. Other board members serve staggered, four-year terms.

Major functions of the board include:

- Establishing role and mission statements for public higher education institutions;
- Identifying goals and priorities; and
- Preparing a comprehensive master plan.

The board makes recommendations on capital and operating budget requests, higher education legislation, tuition and fee policies, and establishing, merging or closing baccalaureate institutions. In addition, the board reviews programs and makes recommendations on minority participation in higher education.

The board also develops assessment programs with public institutions of higher education, and reviews and recommends compensation for administrative employees and faculty. The board monitors higher education for compliance with state policies, and arbitrates and makes binding decisions about disputes among higher education institutions.

Board program duties include:

- Approving new degree programs and approving, modifying or eliminating off-campus programs at the four-year institutions;
- Adopting guidelines for centers and consortia;
- Approving the purchase or lease of major off-campus facilities;
- Defining on-campus and off-campus instructional activities; and
- Approving contracts for off-campus educational programs.

The board has explicit authority to coordinate educational activities among all segments of higher education and to promote cooperation among institutions, establish minimum admissions standards at four-year institutions, establish transfer policies, adopt rules for statutory residency requirements, and administer reciprocity agreements with border states. As part of its coordinating responsibilities, the board also collects, analyzes and distributes information about higher education in the state.

The board administers several programs:

- Student Financial Aid (State Need Grant and State Work Study are the largest);
- The Educational Opportunity Grant; and
- Several smaller scholarship/loan programs.

The board also administers the Displaced Homemaker program, and is under contract with the U.S. Department of Veterans Affairs to approve programs for veterans' benefits.

Recently, the board assumed responsibility for administering the advanced college tuition payment program, known as the Guaranteed Education Tuition (GET) Program. In addition, a college savings program is under discussion.

**Washington higher education institutions**  
**(Data for these institutions are included in the tables of this document.)**

For specific information about a particular institution, the HECB Web site, [www.hecb.wa.gov](http://www.hecb.wa.gov) has links to most institutions listed here.

**Public four-year institutions and locations**

**Research universities**

University of Washington, Seattle  
Washington State University, Pullman

**Comprehensive institutions**

Central Washington University, Ellensburg  
Eastern Washington University, Cheney  
The Evergreen State College, Olympia  
Western Washington University, Bellingham

**Branch campuses**

Branch campuses of University of Washington:

UW Tacoma  
UW Bothell

Branch campuses of Washington State University:

WSU Spokane  
WSU Tri-Cities  
WSU Vancouver

**NOTES:**

**The institutions above offer instruction in Washington State. A few other institutions also operate in Washington State, but data are not available.**

Data for each institution reflect total operations in Washington State. In a few cases, data reflect multiple locations where instruction is delivered in Washington. Some institution data also includes distance-delivered instruction.

Some institutions offer courses for military personnel stationed in Washington. However, in most cases non-military people are also enrolled at these locations.

Sources: IPEDS and HECB survey

## **Data sources**

The source of the data appears at the bottom of each table; following briefly describes the sources.

**HEER:** The Washington Office of Financial Management (OFM) produces the Higher Education Enrollment Report. Data cover enrollment in the six public four-year institutions and are collected each term. This source is used for several tables. (Some minor differences exist between HEER and IPEDS headcount information due to different definitions.)

**IPEDS:** The Integrated Postsecondary Education Data System is a national survey conducted annually by NCES. It covers many areas including enrollment and degrees granted. All degree information in this report is taken from IPEDS. For enrollment, IPEDS is used whenever possible for the public four-year institutions; IPEDS is always used for enrollment in the independent institutions.

**MIS:** The Management Information System (MIS) provides a series of reports on enrollment in the community and technical colleges. The data used in this document primarily came from the Student Management Information System (SMIS). The State Board for Community and Technical Colleges (SBCTC) prepares these reports. Although data are available for both state- and contract-supported students, only state-supported students are reported in this document.

### **Information from the following agencies also is used:**

**NCHEMS:** The National Center for Higher Education Management Systems provides state-by-state data on enrollment; NCHEMS uses IPEDS data as its source. OFM used NCHEMS information to calculate college participation rates from 1981 through 1988.

**NCES:** The National Center for Education Statistics (part of the U.S. Department of Education) collects the yearly IPEDS data. NCES also provides state-by-state compilations of data, which were used to calculate participation rates and state rankings.

**OFM:** The Washington State Office of Financial Management provides HEER data and some budget information.

**OSPI:** The Office of the Superintendent of Public Instruction issues a report annually on the number of Washington public high school graduates. The report is titled, “Dropout Rates and Graduation Statistics by County and School District for School Year (by year).”

**LEAP:** The Legislative Evaluation and Accountability Program Committee data are used for information on General State Fund Expenditures.

**SBCTC:** The State Board for Community and Technical Colleges is the source for enrollment data for these institutions.

**HECB:** The Higher Education Coordinating Board maintains the database of IPEDS information on enrollment and degrees, and compiles information on tuition and fees and financial aid.

## Definitions

**Enrollment:** The number of individual students — headcount — for the fall quarter (or semester) of an academic year.

**Full-time/part-time enrollment:** According to IPEDS, a full-time undergraduate is enrolled for 12 or more credits per semester/ quarter. A full-time graduate student is enrolled for nine or more credits. These definitions apply to headcount enrollment at four-year institutions. At community/ technical colleges, full-time enrollment (state-supported) is 10 or more credits.

**FTE:** Full-time equivalent. This is calculated by taking the total credit hours at a university/college and dividing by the normal full-time credit-hour load. In Washington, the normal load is 15 credit hours for undergraduates, and 10 credit hours for graduate students.

**Degrees granted:** Bachelor's, master's, doctorates and first professional degrees are reported for the public and independent four-year institutions. Associate degrees are reported only for the public community and technical colleges. (Note: in Washington, professional degrees are awarded in five general areas: medicine, dentistry, pharmacy, veterinary medicine, and law.)

**Field of study:** “Degrees awarded by Field of Study” is a series of tables in the “Degrees Granted” section. Information for these tables comes from IPEDS. IPEDS codes degrees by Classification of Instructional Programs (CIP) categories. For field-of-study tables, the CIP codes have been aggregated into 13 major fields (delineated by OFM), as follows:

- (1) agriculture and natural resources (includes agribusiness, agricultural sciences, natural resources, home economics, vocational home economics, and parks and recreation);
- (2) architecture (includes architecture and environmental design);
- (3) business (includes business and management, business and office, marketing and distribution, and consumer, personal, and miscellaneous services);
- (4) computer science (includes computer and information science);
- (5) engineering and related technologies;
- (6) arts and letters (includes area and ethnic studies, communications, communications technologies, foreign languages, letters, liberal/general studies, library and archival sciences, multi/ interdisciplinary studies, philosophy and religion, theology, and visual and performing arts);
- (7) education;
- (8) health (includes allied health and health sciences);
- (9) law;
- (10) sciences (includes life sciences, mathematics, physical sciences, science technologies);
- (11) social sciences (includes psychology, protective services, public affairs, and social sciences);

- (12) trades (includes construction trades, mechanics and repairers, precision and production, and transportation and material moving); and
- (13) other.

**Fiscal year:** The fiscal year begins July 1 and ends June 30 of the following calendar year.

**Geographic origin:** This category classifies a student by his/her home address at the time of initial application. In-state refers to those from Washington; out-of-state includes other U.S. states, territories, and possessions; foreign refers to other countries.

**Level of enrollment:** The source of data is IPEDS. “Lower division” is calculated as all freshmen, all other first-year, and all second-year students, and half of the unclassified undergraduates. “Upper division” are third-year students, and fourth-year and beyond, and half of the unclassified undergraduates. “Graduate” students and “first professional” students are listed separately. In some cases, lower division and upper division are combined as “undergraduates,” and a combined “post-baccalaureate” category includes graduate and first-professional enrollment.

**Participation rate:** This calculation compares enrollment to population. Specifically, the rate is calculated by dividing the number of persons enrolled by the population aged 17 and over. The result is the percent of the 17-and-above population actually enrolled in various sectors (public and independent four-year and public community colleges) of the higher education system. The participation rate in Washington can be compared to rates in other states.

#### **Ethnicity/race categories – IPEDS:**

*Non-resident alien:* A person who is not a citizen or national of the United States and who is in this country on a visa or temporary basis and does not have the right to remain indefinitely.

*Black, non-Hispanic:* A person having origins in any of the black racial groups of Africa (except those of Hispanic origin).

*American Indian or Alaskan Native (Native American):* A person having origins in any of the original peoples of North America or who maintains cultural identification through tribal affiliation or community recognition.

*Asian or Pacific Islander:* A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or Pacific Islands. This includes people from China, Japan, Korea, the Philippine Islands, Samoa, India, and Vietnam.

*Hispanic:* A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

*White, non-Hispanic:* A person having origins in any of the original peoples of Europe, North Africa, or the Middle East (except those of Hispanic origin).

*Race/ethnicity unknown:* **This category was introduced in the 1990 survey.** This category is used ONLY if the student did not select a racial/ethnic designation, and the postsecondary institution finds it impossible to place the student in one of the aforementioned racial/ethnic categories.

*For this publication, six race/ethnic categories are used: Non-resident alien, Black, Native American/Alaskan Native, Asian/Pacific Islander, Hispanic, and white/unknown. This final category is a total of white, unknown, and other race or ethnicity.*

## **Section 1: Enrollment in higher education**

This section has three components:

- 1.A. Total Enrollments
- 1.B. Enrollments in specific areas, such as branch campuses
- 1.C. Enrollment in Washington compared to the state's population

## 1.A. Total headcount enrollments

### Introduction

Tables on the following pages present total enrollments for the three sectors of higher education in Washington. It should be noted that enrollments reflect the following:

- Each of the six public baccalaureate institutions has provided four-year public enrollments. Enrollments at centers or branch campuses of an institution are included in the total for that institution.
- Community and technical college enrollments in this publication reflect only the portion that is state-supported. There is additional enrollment in the community and technical colleges funded through contractual arrangements, such as Running Start, or on a student-funded basis. For example, in fall 2000, state-supported headcount was 181,915 — as shown in the following tables. Not shown are an additional 35,518 contract enrollments, and 34,945 student-funded enrollments at the community and technical colleges.
- Independent enrollments in the tables of this publication reflect 15 higher education institutions in this state (a listing is provided at the bottom of each table). A number of other institutions also offer instruction in Washington. **Page 15** of this document displays available enrollment data for many of these other higher education providers.

Data tables and graphs show total fall headcount enrollments for each year — in most cases, fall 1990 through fall 2000. Following are some trends indicated by the data:

- Total enrollments  
From fall 1990 to 2000, enrollments have steadily increased in all sectors.
- Gender:  
An increasing proportion of enrollments are female.
- Race/ethnicity:  
Because total enrollments have grown, numbers of enrollments in all race/ethnic categories have also increased during the decade. However, the percentage of enrollments of race/ethnic minority groups has grown in some cases, but remained static in others.
- Full-time enrollment compared to part-time:  
In general the proportion of part-time enrollment has remained stable — about 16 percent part-time at public four-year institutions, and about 35 percent at independent four-year institutions. The community/technical colleges show a slight reduction in the part-time status of students — about 46 percent were part-time in 2000, compared to 49 percent a decade earlier.

- Level of enrollment:

Data show a stable breakdown between undergraduate and graduate enrollments over time. At the public four-year institutions, about 82 percent of all enrollments are at the undergraduate level, with about 18 percent in graduate or professional programs. Independent four-year enrollments show about 70 percent in undergraduate courses. (All enrollments at community and technical colleges are at the undergraduate level.)

It is interesting to note that undergraduate enrollments, when separated by lower and upper division, show that over time, at the public four-year institutions, there was a slight increase of 2 percent in the proportion of enrollments in upper-division courses. However, the federal data source, IPEDS, no longer provides data to compare upper- and lower-division enrollments.

- Residence status of students at public institutions:

Residents of Washington comprise the largest proportion of enrollments in the public institutions. More than 96 percent of community college students, and 86 percent of four-year students, are residents of the state.

- Age characteristics of students at public institutions:

Different age patterns exist at the two types of institutions. In fall 2000, students **under age 25** comprise 70 percent of enrollments at the four-year sector, but only 44 percent at community/technical colleges.

## **1.B. Enrollments in specific areas**

### **Introduction**

The following tables present information on specific types of enrollments — that is, subsets of the total enrollments at the various institutions.

- **Public High School Graduates Continuing to Public Higher Education:**  
Data in this table provide the total number of high school graduates, compared to those who enter a public four-year or community/technical college the following fall. In the last few years, 47 to 50 percent of high school graduates entered public institutions in this state. Because the data provided here refer only to public institutions, students who enter independent institutions or go to college in other states, are not included. (Other data sources that include these additional higher education enrollments indicate of 63 percent of high school graduates enroll in college immediately after graduation.)
- **Distance Learning:**  
The Office of Financial Management recently began collecting data on enrollments provided at a distance — situations in which teachers and students are physically separated, and instruction uses distance-delivery modes, such as the Internet. At the public institutions, headcount enrollment in distance learning is more than 17,000 in state-supported instruction. This number is expected to increase.
- **Branch campus enrollments:**  
Branch campuses were established for the two research universities in the early 1990s. Enrollments at branch campuses are included in this document where totals for the University of Washington and Washington State University are displayed. The table here shows the subset of those totals at each branch — over the last decade. By fall 2000, enrollments had increased to more than 6,000 at the branch locations.

**DEFINITIONS of DISTANCE LEARNING:**

"Distance Learning" reflects academic courses where teachers and students are physically separated for a predominant (51% or more) amount of time, and instruction is delivered predominantly through one of the delivery modes (correspondence, pre-recorded, telecast, interactive, or internet). If several delivery modes are used in a course, only the predominant mode is coded.

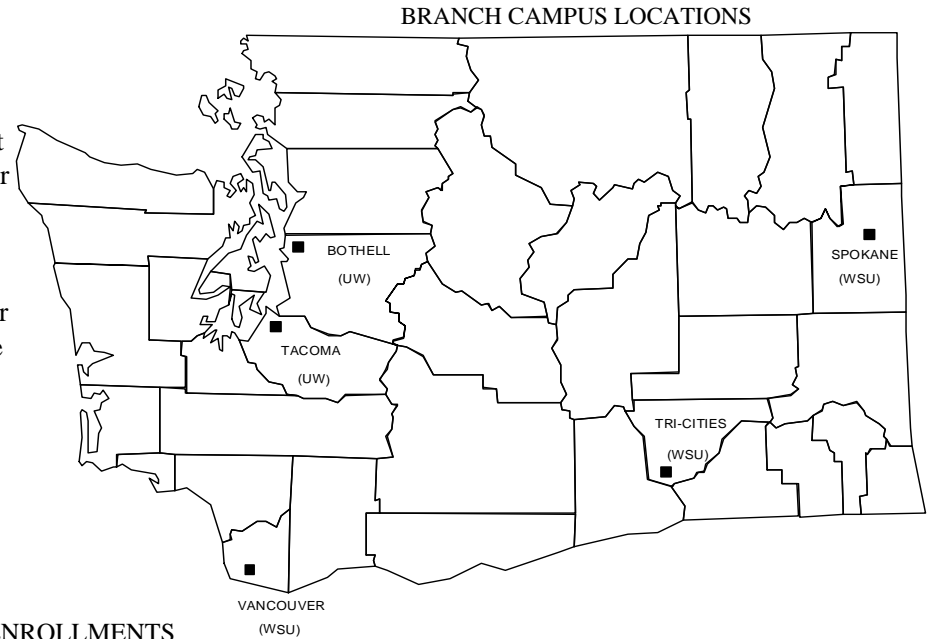

Types of Distance Learning:

Correspondence:	Individualized self-paced studies, traditionally print-based and conducted via regular mail.
Pre-Recorded (non-internet):	Delivery through videotapes, audiocassettes, CD ROM, DVD, or other pre-recorded devices (including telecourses and computer based packages).
Telecast (non-internet):	Delivery using satellite or/ or cable TV. Courses are not interactive.
Interactive (non-internet):	Delivery using K-20 or other interactive video conferencing tools.
	Delivery is characterized by live interactive capabilities.
Internet:	Delivery over the Internet with applications to link faculty and students.

Data Source: OFM, March 30, 2001, "Information on Distance Learning"

## BRANCH CAMPUSES: UNIVERSITY OF WASHINGTON AND WASHINGTON STATE UNIVERSITY

The development of branch campuses in the early 1990's marked the first significant expansion of the state's public higher education system in over two decades. Branch campuses address the issue of access for urban growth areas which did not have a public four-year institution. Branch campuses have been designated to provide upper division and graduate level instruction for baccalaureate and master's degrees. A limited number of lower-division courses may be offered, but the majority of students are expected to transfer to a branch campus after acquiring lower division coursework elsewhere, particularly at nearby community colleges. The following displays enrollments at branch campuses since 1990, with a map showing the locations of branch campuses.

**BRANCH CAMPUS ENROLLMENTS

NOTE: These branch campus enrollments are part of the total enrollments of the University of Washington and Washington State University -- as reported in other tables in this document.  
SOURCE: OFM (HEER)

## **1.C. Enrollments compared to population**

### **Introduction**

Participation rates compare the percentage of the population of Washington enrolled in college at a point in time. Participation rates are displayed in the following two tables. These participation rates show over time whether there have been increases or decreases in the percentage of the population enrolled in college, which may indicate levels of access or availability of college opportunities.

In addition, Washington's participation rates are compared to other states in the nation. These calculations show how the state ranks compared to all 50 states regarding the percent of the population enrolled in higher education.

The two tables show state rankings for several types of higher education enrollments. One type of ranking shows that, because of its large community college system, Washington ranks high for public two-year participation — fourth in the nation. On the other, Washington's rank for public four-year participation is much lower — 48<sup>th</sup> in the nation.

Similarly, participation rates for lower division (freshman and sophomore levels) are high in Washington, again because of the community/technical college system. Upper-division (junior and senior) participation rates are much lower for Washington than for most other states.

"Other" refers to post-baccalaureate not in a graduate program.

## Section 2.

### Degrees granted in higher education

#### Introduction

The following tables and graphs present data for the higher education institutions, both public and independent. It should be noted that the data tables represent the following institutions:

- Degrees granted by each public four-year institution. All degrees granted at branches or centers are included with each institution's data.
- Data are presented for 15 independent institutions (a listing of these institutions is provided at the bottom of each table). A number of other independent institutions also offer instruction and grant degrees in Washington. **Page 15** of this document displays available enrollment and degree data for many of the other higher education providers.
- Associate degree/certificate data reflect only the community and technical colleges – i.e., the two-year public sector.

The following pages provide tables with 10 years of data showing total degrees granted for each type of degree: associate's, bachelor's, master's, doctorates, and professional degrees. In all cases, the number of degrees granted over the last decade has increased, relative to the increases in enrollment over this same time period.

In addition to total degrees, tables in this section display degree data by gender, by race/ethnicity, and by major fields of study. Both numbers of degrees, and distribution percentages, are given. Some of the trends indicated by the data are the following:

- Gender:  
The percentage of degrees awarded to females has increased over the last decade (relative to the enrollment of a greater proportion of female students).
- Race/ethnicity:  
Similar to enrollment trends, all race/ethnic minority groups show increases in numbers of degrees received over the decade. The proportion of total degrees received by various minority groups has increased in some cases, and remained static for other groups.
- Field of Study:  
Degrees (bachelor's and above) have been categorized into 12 major fields of study. Data for these 12 fields are provided for the most recent three years. In general, the highest numbers of awards are granted in the fields of "arts and sciences," "social sciences," and "business." (See **page 17** for a description of the fields of study.)

## Section 3:

### Finance of higher education

#### Introduction

This section presents several types of data related to the financing of higher education. Included are the following:

- Tables review two of the main sources of funding for public higher education: the State General Fund, and tuition collected from students. The first two tables show the entire State General Fund, by function, with higher education being one of the functions. These tables display higher education's funding levels, and higher education's percentage of the total General Fund, over time. A third table shows both the General Fund and the total tuition funds contributed by students.
- Enrollment based on Full-Time Equivalent (FTE) students is also provided in this section. FTE calculations are used for budgeting purposes. Headcounts — as used in tables in the first section of this document — are derived by counting the number of students. FTE data are calculated by taking the total credit hours of enrollment at an institution, and then dividing by the normal full-time credit load. For undergraduates, 15 credits is a normal load; for graduates, 10 credits is a normal load. Because many students enroll part-time, the FTE enrollment is often a smaller number than the headcount enrollment.
- Tuition amounts charged to *individual* students are contained in this section. Tables of average tuition and fees over time indicate significant increases in the last several years. Details of current tuition charges for the 2001-2002 academic year are also provided.

Financial aid data is provided in several tables. Data include numbers of students, and demographic characteristics of those receiving financial aid.

SOURCE: LEAP 1998, 1999, 2000, 2001 (Legislative Budget Notes)

## NOTES:

LEAP has revised data for the biennial periods to reflect the current configuration of State General Fund expenditures:

For Higher Education, tuition has been removed to reflect the current practice whereby institutions retain tuition in a local account and no longer remit tuition to the General Fund.

Technical Colleges are no longer included with "Public Schools," but with "Higher Education."

"Higher Education" includes: Public Four-Year Institutions, Community and Technical Colleges, and the Higher Education Coordinating Board. The Joint Center for Higher Education was included through fiscal year 1997-98.

"Other Education" includes the following: Compact for Education, School for the Blind, School for the Deaf, Work Force Training and Education Coordinating Board, State Library, Washington State Arts Commission, Washington State Historical Society, Eastern Washington State Historical Society.

**NOTES:**

Four-Year Institutions: Timber/Salmon FTEs were allocated to HECB between 1991-92 and 2000-2001, and distributed to WSU and WWU. These FTEs are included in the institution totals.

Community/Technical College totals include the following:

FTEs for Timber-Dependent Communities -- 1991-92 through 2000-01.

Work Force Training FTEs -- 1993-94 through 2002-03.

In 2000-2001, 550 high-demand FTEs were allocated to HECB, and distributed to various two- and four-year public institutions. These FTEs are included in the institution totals.

**NOTES:**

These dollar amounts apply to students enrolled full-time -- taking 10 or more credit hours.

Beginning academic year 1995-96, these are average amounts; actual amounts vary slightly among institutions.

Averages represent the Building Fee, Operating Fee, and Services & Activities Fee. Technology Fees, and specific tuition charges for certain programs, are not included in the average calculations

See following pages for Tuition and Fees at each public institution in 2001-02.

Research = UW and WSU; Comprehensive = CWU, EWU, TESC, WWU
